

SMOG FLAG

handbook

PLATO raises Smog Flag since 2019. It was made for the Ostrava Municipal Gallery by artist Marius Konvoj. Both individuals and institutions are welcome to join the intervention. For more information, go to www.plato-ostrava.cz.

PLATO is a contributory organisation of the Statutory City of Ostrava.

PLATO

How to raise my Smog Flag

Every morning I check the quality of air in my village/ town using the **Smogalarm** app at www.cistenebe.cz (click on Air Quality Index) or www.chmu.cz (click on Air Quality).

3A

3B

When the quality of air is unhealthy to hazardous (level 3A or 3B), I raise the flag in a visible place (e.g., street window, flagpole). The flag should be raised all day even if the quality of air improves.

1A

2B

When the quality of air is good to moderate (level 1A to 2B), I don't raise the flag.

The next morning I check the air quality at the website.
